Strengths & Interests

- Quick learner and passionate about frontend development
- Eager to work on real-time projects and learn from practical experience
- Efficient with time-limited tasks using AI tools for productivity

Hobbies

- Netflix & Chill 🎬
- Movie Buff – I enjoy exploring films and storytelling

Declaration

I hereby declare that the information provided above is true to the best of my knowledge.

EDUCATION

B.Tech in Computer Science & Engineering

College of Engineering Bhubaneswar

2023 – Present | Currently in 3rd Year.

Objective

Aspiring frontend developer currently pursuing B.Tech in CSE. Eager to apply foundational skills in HTML, CSS, JavaScript, and Bootstrap to real-world projects. Open to internship opportunities that provide hands-on experience and learning. Strong interest in web design and AI-powered tools for efficient web development

Technical Skills

- **Frontend:** HTML, CSS, Bootstrap, JavaScript (Beginner)
- **Programming:** Python (Beginner)
- **Other:** Working with APIs, Responsive Design using Bootstrap
- **Tools:** VS Code, Git (basic), AI-based web builders

Projects

1. Student Panel Website

Created a basic student panel for college use with sections like login, student info display, and notice board. Designed using HTML, CSS, Bootstrap.

2. API Integration Practice

Built a small project fetching and displaying data from public APIs (like weather/news) to gain hands-on experience with JS and asynchronous functions.

3. AI-Assisted Webpages

Explored AI tools to generate responsive webpages within 1 hour, showcasing the ability to work smartly and quickly with minimal resources.
